Assurance of Confidentiality: The voluntarily provided information obtained in this surveillance system that would permit identification of any individual or institution is collected with a guarantee that it will be held in strict confidence, will be used only for the purposes stated, and will not otherwise be disclosed or released without the consent of the individual, or the institution in accordance with Sections 304, 306 and 308(d) of the Public Health Service Act (42 USC 242b, 242k, and 242m(d)). CDC 57.320 Rev. 3, v9.2

Public reporting burden of this collection of information is estimated to average 20 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering, and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC, Reports Clearance Officer, 1600 Clifton Rd., MS H21-8, Atlanta, GA 30333, ATTN: PRA (0920-0666).

*Severity Did the patient receive or experience any of the following? ☐ No treatment required Symptomatic treatment only ☐ Hospitalization, inlcuding prolonged hospitalization Life-threatening reaction ☐ Disability and/or incapacitation Congenital anomaly or birth defect(s) of the fetus □ Death Other medically important conditions ☐ Unknown or not stated *Imputability Which best describes the relationship between the transfusion and the reaction? Conclusive evidence exists that the adverse reaction can be attributed to the transfusion. Evidence is clearly in favor of attributing the adverse reaction to the transfusion. Evidence is indeterminate for attributing the adverse reaction to the transfusion or an alternate cause. Evidence is clearly in favor of a cause other than the transfusion, but transfusion cannot be excluded. There is conclusive evidence beyond reasonable doubt of a cause other than the transfusion. The relationship between the adverse reaction and the transfusion is unknown or not stated. Did the transfusion occur at your facility? ☐ YES \square NO **Module-generated Designations** NOTE: Designations for case definition, severity, and imputability will be automatically assigned in the NHSN application based on responses in the corresponding investigation results section above. ☐ YES *Do you agree with the case definition designation? ^Please indicate your designation *Do you agree with the severity designation?
