

Introduction to the National Healthcare Safety Network – Dialysis Event Surveillance

Letty Lamping, MPH
Public Health Analyst
Dialysis Team – Surveillance Branch

July 2024

Objectives

- Review National Healthcare Safety Network (NHSN)
- Brief Review of Outpatient Dialysis Component
- Outpatient Dialysis Center Practices Survey
- Dialysis Event Surveillance Annual Training Course and Post- Assessment Test
- Dialysis Component Requirements (Monthly Reporting Plan, Denominator Data)
- Dialysis Event Surveillance Protocol & Requirements

National Healthcare Safety Network (NHSN)

National Healthcare Safety Network (NHSN)

- The nation's most widely used healthcare-associated infection (HAI) tracking system.
- Data can identify problem areas, measure progress of prevention efforts, and eliminate healthcare-associated infections.
- Healthcare facilities can track blood safety errors and important healthcare process measures
- Provides medical facilities, states, regions, and the nation with data collection and reporting capabilities needed to:
 - Identify infection prevention problems by facility, state, or specific quality improvement project
 - Benchmark progress of infection prevention efforts
 - Comply with state and federal public reporting mandates
 - Drive national progress towards HAI elimination

Enrollment

Enrollment – Getting Started

- **NHSN Facility Enrollment Checklist**
 - <http://www.cdc.gov/nhsn/pdfs/dialysis/enrollment-checklist.pdf>
- **If the facility is enrolled, see the NHSN New User Checklist**
 - <http://www.cdc.gov/nhsn/PDFs/dialysis/NHSN-de-New-User-Checklist.pdf>

NHSN Facility Enrollment Checklist for Outpatient Dialysis Facilities

This checklist is for new users to enroll a new facility in NHSN.

Complete items in order	Time
Step 1: Training and Preparation	
Complete required Dialysis Event Surveillance training. Use this guide to assist you: https://www.cdc.gov/nhsn/pdfs/dialysis/de-training-guide-508.pdf	2 HRS
Complete the Outpatient Hemodialysis Facility Enrollment Checklist. In Internet Explorer, add "cdc.gov" to the list of trusted websites and permit pop-ups for these sites.	5 MIN
Change spam-blocker settings to allow all email from NHSN@cdc.gov and SAMS-no-reply@cdc.gov.	10 MIN
TIP: Save NHSN websites to your Internet Explorer "favorites" to find them easily. Save https://www.cdc.gov/nhsn/pdfs/dialysis/de-training-guide-508.pdf for resources and https://sams.cdc.gov to access NHSN.	5 MIN
Step 2: NHSN Facility Administrator Adds User & Assigns User Rights	
For a new user to get started, a facility user with administrator rights must access NHSN, add the new user to the facility, and assign them user rights. Adding the new user immediately generates an NHSN email, subject "Welcome to NHSN".	
From your "Welcome to NHSN" email link, read and agree to the Rules of Behavior.	5 MIN
Enter the date that you completed your required training.	1 MIN
Step 3: Obtain Access to CDC's Secure Access Management Services (SAMS)	
Register with SAMS to access NHSN. If you need help with SAMS, email SAMShelp@cdc.gov . NOTE: You will receive a SAMS invitation email for each NHSN facility you are added to, but obtaining access to SAMS is required only once, as long as the same email address is used each time.	
Receive an email from "SAMS No-Reply (CDC)" within 1 business day and register with SAMS.	15 MIN
Make a copy of your SAMS password and store in a secure location.	1 MIN
User will receive an Identity Verification email. Select Option 1 (Experian) or Option 2 (Document Review) and follow the instructions outlined in the email. If Option 2 is selected, complete identity verification documents and submit them to CDC.	varies
Wait for welcome emails from SAMS and NHSN, as well as the SAMS grid card to be delivered to your home address.	

Last revised: November 03, 2021

NHSN New User Checklist for Outpatient Dialysis Facilities

This checklist is for new users added after a facility is enrolled in NHSN. Need enrollment resources? Visit this site: <http://www.cdc.gov/nhsn/dialysis/enroll.html>.

CDC recommends and CMS requires for the ESRD QIP that at least one staff member at the facility is trained in and knowledgeable of how to report dialysis event data to NHSN. It is recommended to have at least two users with administrator rights per facility to provide coverage for staff absences and turnover.

GET ACCESS TO NHSN

Complete steps in order	TIME
STEP 1: Training and Preparation	
Complete required Dialysis Event Surveillance training: https://www.train.org/cdc/train/applcme . Use this guide to assist you: https://www.cdc.gov/nhsn/pdfs/dialysis/de-training-guide-508.pdf	2 HRS
In Internet Explorer, add "cdc.gov" to the list of trusted websites and permit pop-ups for these sites.	5 MIN
Change spam-blocker settings to allow all email from NHSN@cdc.gov and SAMS-no-reply@cdc.gov.	10 MIN
TIP: Save NHSN websites to your Internet Explorer "favorites" to find them easily. Save https://www.cdc.gov/nhsn/pdfs/dialysis/de-training-guide-508.pdf for resources and https://sams.cdc.gov to access NHSN.	5 MIN
STEP 2: NHSN Facility Administrator Adds User & Assigns User Rights	
For a new user to get started, a facility user with administrator rights must access NHSN, add the new user to the facility, and assign them user rights. Adding the new user immediately generates an NHSN email, subject "Welcome to NHSN".	
From your "Welcome to NHSN" email link, read and agree to the Rules of Behavior.	5 MIN
Enter the date that you completed your required training.	1 MIN
STEP 3: Obtain Access to CDC's Secure Access Management Services (SAMS)	
Register with SAMS to access NHSN. If you need help with SAMS, email SAMShelp@cdc.gov . NOTE: You will receive a SAMS invitation email for each NHSN facility you are added to, but obtaining access to SAMS is required only once, as long as the same email address is used each time.	
Receive an email from "SAMS No-Reply (CDC)" within 1 business day and register with SAMS.	15 MIN
Make a copy of your SAMS password and store in a secure location.	1 MIN
User will receive an Identity Verification email. Select Option 1 (Experian) or Option 2 (Document Review) and follow the instructions outlined in the email. If Option 2 is selected, complete identity verification documents and submit them to CDC.	varies
Wait for welcome emails from SAMS and NHSN, as well as the SAMS grid card to be delivered to your home address.

National Center for Emerging and Zoonotic Infectious Diseases
Division of Healthcare Quality Promotion

SAMS

- **Secure Access Management Services (SAMS)** is the secure gateway used to access NHSN
 - Each NHSN user must have their own SAMS account
 - You will receive an email invitation to SAMS when you are added as a user to NHSN
- **Log in to SAMS**
 - <https://sams.cdc.gov>
- **Select the “NHSN Reporting” option**

The screenshot shows the SAMS login interface. At the top, there is a blue header with the SAMS logo and the text "secure access management services". Below the header is a warning banner. The main content area is divided into two sections: "External Partners" and "HHS Staff".

External Partners

SAMS Credentials

Includes a keyboard icon, input fields for "SAMS Username" and "SAMS Password", a "Login" button, and a link for "Forgot Your Password?".

SAMS Grid Card

Includes a grid card icon, a "Click the Login button to sign on with a SAMS Grid Card" instruction, a "Login" button, and a note: "For External Partners who have been issued a SAMS Grid Card."

HHS Staff

AMS Login

Includes the "HHS.gov" logo, a "How to use AMS" link, a "Login" button, and a note: "For all HHS staff including Operating Divisions (CDC, NIH, FDA, etc.)"

AMS One Time Password

Includes a smartphone icon displaying "AMS OTP" and "8031", a "How to use OTP" link, a "Login" button, and a note: "For all HHS staff including Operating Divisions (CDC, NIH, FDA, etc.) with a One Time Password."

The screenshot shows the SAMS dashboard. At the top, there is a blue header with the SAMS logo and the text "secure access management services". Below the header is a "Menu" section with links for "My Profile", "Logout", and "Links". The main content area is titled "My Applications" and lists "National Healthcare Safety Network System" with a bullet point for "NHSN Reporting". A note at the bottom states: "* Strong credentials required."

Submit

Outpatient Dialysis Component

NHSN Dialysis Component

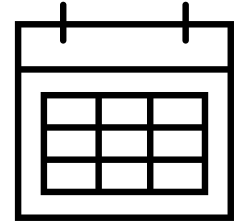

- Two of the surveillance modules within the Dialysis Component include the Dialysis Event and Prevention Process Measures.
- Participation in the Dialysis Component requires:
 1. Users complete training for each module in use
 2. Completion of the annual Outpatient Dialysis Center Practices Survey
 3. Monthly Reporting Plans indicate what surveillance the facility is doing according to NHSN protocol(s)

Find reporting resources for each: <http://www.cdc.gov/nhsn/dialysis/index.html>

Annual Surveys

NHSN Outpatient Dialysis Center Practices Survey

- **Complete one survey per NHSN facility organization ID (org ID)**
 - Your facility only needs to complete one survey each year
- **Complete survey in February of each year**
 - Multiple questions pertain to patients and staff present during the first week of February
- **Data collection should be performed by someone who works in the center and is familiar with center's practices**
- **The survey should be completed based on the center's actual practices, not necessarily the center's policies, if there are differences**

Dialysis Event Surveillance Annual Training Course and Post-Assessment

NHSN Dialysis Event Surveillance Course and Post-Assessment

- The Dialysis Event Surveillance Annual Training Course and Post-Assessment are available to NHSN Dialysis Component users.
- The goal of this activity is to teach healthcare personnel how to collect and report dialysis event infection data to the National Healthcare Safety Network (NHSN).
- Users may access the training course and post assessment on the NHSN Dialysis homepage <https://www.cdc.gov/nhsn/training/dialysis/index.html> selecting the following Dialysis Event Surveillance Annual Training Course and Post-Assessment and WB4638 Continuing Education Information for an overview of credits.
- Once users pass the post-assessment instructions will appear on the score page on obtaining their CE credits.

Dialysis Component Requirements

Monthly Reporting Plan

Monthly Reporting Plan

- The Monthly Reporting Plan is used by NHSN facilities to inform CDC that they are following the NHSN surveillance protocol.
- To indicate the facility is reporting in accordance with this protocol, users complete a Monthly Reporting Plan.
- If your facility is not following any protocols for the Dialysis Component modules for a particular month (e.g., the facility was closed), select “Not Participating in NHSN this Month.”

Dialysis Component Requirements

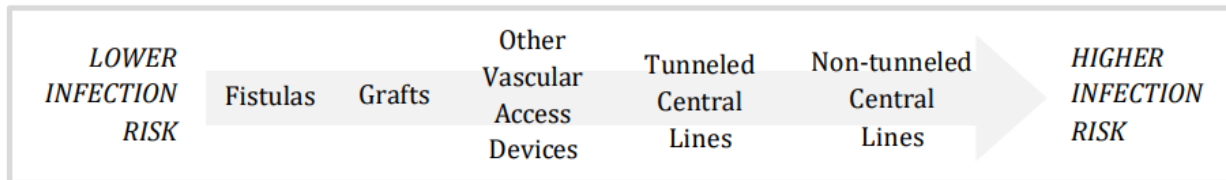

Denominator Data

Denominator Data

- Each month, report the number of hemodialysis outpatients by vascular access type who received hemodialysis at the center during the first two working days of the month.

Sun	Mon	Tue	Wed	Thu	Fri	Sat
1 Closed	2 Working Day 1	3 Working Day 2	4	5	6	7

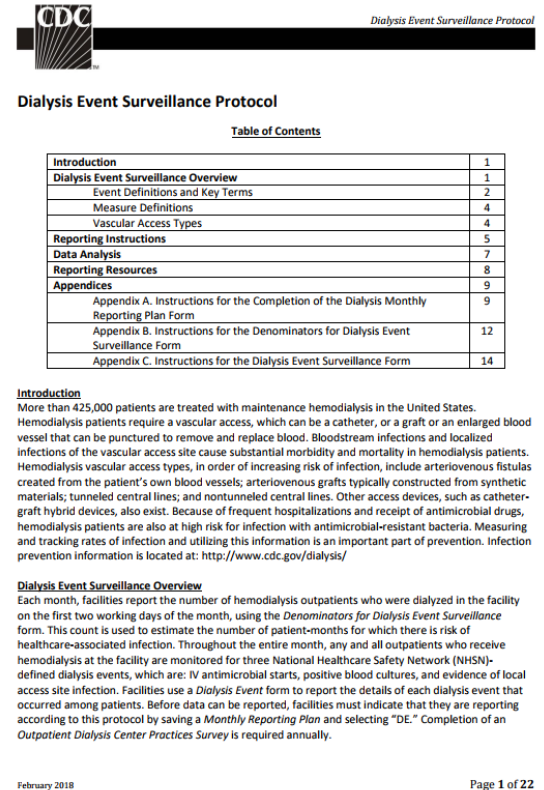

- Report all hemodialysis outpatients, including transient patients, and patients with acute kidney injury (AKI).
- Exclude non-hemodialysis patients (i.e., home dialysis patients) and exclude inpatients.
- Count each patient only once by vascular access type
 - If a patient has multiple vascular access types, record that patient once, reporting only their vascular access type with the highest risk of infection.

Dialysis Event Protocol & Requirements

Required Reading: Dialysis Event Protocol

- The Dialysis Event Protocol is a document that provides instructions for reporting to NHSN
- All users must read the Dialysis Event Protocol and follow the instructions, definitions and procedures

<http://www.cdc.gov/nhsn/PDFs/pscManual/8pscDialysisEventcurrent.pdf>

Dialysis Event Surveillance

- The reporting protocol is designed to reliably capture data useful for informing quality improvement decisions.
- All participants are required to follow the protocol so data are uniformly collected across users in different facilities, and meaningful comparisons can be made.
- **Dialysis Event Surveillance has FOUR requirements:**
 1. Outpatient Dialysis Center Practices Survey
 2. Monthly Reporting Plan
 3. Denominators for Dialysis Event Surveillance form
 4. Dialysis Event form

Protocol: Report Numerator (Event) Data

- **Throughout the month, monitor all outpatients who undergo hemodialysis at your facility for dialysis events.**
 - Even if they were not present on the 1st two working days.
 - Monitor transient patients and acute kidney injury patients and report dialysis events that occur at your facility.
- **Report an event for any of the three types of dialysis events:**
 - Positive blood culture
 - IV antimicrobial start
 - Pus, redness or increased swelling at the vascular access site
- **Report all the patient's vascular accesses on the event form, regardless of whether they are in use for hemodialysis, abandoned, or non-functional.**

Dialysis Event Combinations

- **If multiple dialysis events occur together, as a part of the same patient problem, they should be reported on the same Dialysis Event form.**
 - One Dialysis Event record may include:
 - Positive blood culture
 - IV antimicrobial start
 - Pus, redness or increased swelling at vascular access site
- **Determining if events should be reported together can be subjective**
- **Purpose:**
 - Improves clinical usefulness and interpretability of surveillance data
 - Reduces data entry burden

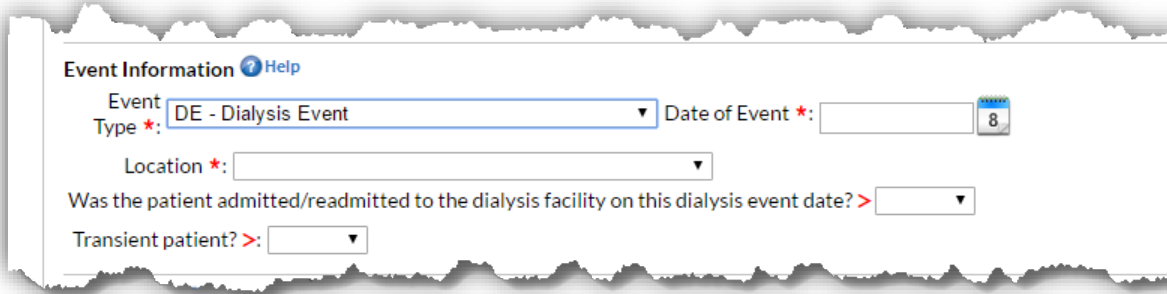

Dialysis Event Form: Patient Information

- **Required fields: Facility ID, Patient ID, and Date of birth**
 - Recommendation: use the patient's Medical Record Number as the Patient ID

The image shows a blurred screenshot of a web-based form titled "Dialysis Event Form: Patient Information". The form is designed for data entry and includes several input fields. At the top, there is a light blue header bar with a logo on the left. Below the header, the form is organized into sections. The first section contains fields for "Facility ID", "Patient ID", and "Date of birth", which are marked as required fields with red asterisks. To the right of these fields, there are additional input fields for "First Name", "Last Name", and "Middle Name". Below these, there are more fields for "Address", "City", "State", and "Zip Code". The form also includes a "Save" button and a "Cancel" button. The overall layout is clean and professional, typical of a medical or healthcare application.

Dialysis Event Form: Event Information

- Event type = “Dialysis Event”
- Date of event

The screenshot shows a web form titled "Event Information" with a "Help" link. It contains several input fields: "Event Type" is a dropdown menu with "DE - Dialysis Event" selected; "Date of Event" is a date picker showing the 8th; "Location" is an empty dropdown menu; "Was the patient admitted/readmitted to the dialysis facility on this dialysis event date?" is a dropdown menu with a red ">" icon; and "Transient patient?" is a dropdown menu with a red ">" icon.

Event Type	Date of Event
IV Antimicrobial Start	Date of first outpatient dose of an antimicrobial course
Positive Blood Culture	Date of specimen collection
Pus, Redness, Swelling	Date of onset
Combination	Earliest date among related event types

Dialysis Event Form: Risk Factors

- Specify all vascular access types present at the time of event and access placement date, if known

Risk Factors

All Vascular Access Types Present (check all that apply) >:

Access Placement Date:MM/YYYY

☐ Fistula
Buttonhole?

▼

☐ Unknown

Access used for dialysis at the time of the event:
(If more than one access was used for the dialysis treatment,
please indicate the access with the higher risk of infection):

▼

Dialysis Event Form: Event Details

- Specify the dialysis event type(s) and associated details
- Indicate problems associated with the events and outcomes
 - Outcomes should only be reported if they are related to the event
- Use the “Comments” box to add any additional information

The screenshot displays the 'Event Details' section of a web form. It includes a 'Specify Event' section with checkboxes for 'IV antimicrobial start' and 'Positive blood culture', each followed by a dropdown menu. Below these are checkboxes for 'Pus, redness, or increased swelling at vascular access site' and 'Check the access site(s) with pus, redness, or increased swelling', followed by a dropdown menu for 'Suspected source of positive blood culture:'. A row of checkboxes follows: 'Fistula', 'Graft', 'Tunneled Central Line', 'Nontunneled Central Line', and 'Other vascular access device'. The 'Problem(s)' section has a dropdown menu and checkboxes for 'Fever >= 37.8°C (100°F) oral', 'Chills or rigors', 'Drop in blood pressure', 'Wound (NOT related to vascular access) with pus or increased redness', 'Cellulitis (skin redness, heat, or pain without open wound)', 'Pneumonia or respiratory infection', 'Urinary tract infection', and 'Other problem (specify):' followed by a text input field. The 'Outcome' section has a dropdown menu and checkboxes for 'Loss of vascular access:', 'Hospitalization:', and 'Death:'. The 'Custom Fields' section is empty. The 'Comments' section is a large text area. At the bottom right are 'Save' and 'Back' buttons.

Event Details [Help](#)

Specify Event (check one or more) >:

-----------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------

Numerator Data – Confirming there were zero events

- Each month, your facility must account for each dialysis event type.
- So, for each event type, either:
 - The event is reported on one or more Dialysis Event forms, or
 - The “report no positive blood culture events” box for that event type is checked on the Monthly Reporting Plan to confirm no events (i.e., zero) of that type occurred during the month.
- When you check the “report no positive blood culture events” box it means:
 - You have reviewed your records and are confirming there were no reportable positive blood culture events that occurred that month in your patients.

Dialysis Event Requirements – 21 Day Rule

Dialysis Event “21-Day Rule”

- An event reporting rule which reduces reporting of events likely related to the same patient problem.
 - E.g., multiple positive blood cultures may result from a single infection
- **21 or more days must exist between two dialysis events of the same type for the second occurrence to be reported as a separate (new) dialysis event.**
- **If fewer than 21-Days have passed since the last reported event of the same type, the subsequent event of the same type is NOT considered a new dialysis event and it is not reported.**
- The 21-Day rule applies across calendar months.
- Refer to each event definition in the protocol for instructions on applying the 21-Day rule for each specific dialysis event type.

Applying the 21-Day Rule in Situations where patients have had >1 of the same event type

- **Positive Blood Culture 21-Day Rule:**
 - Only report another positive blood culture for the same patient if there have been ≥ 21 -Days since their last positive blood culture date
- **IV Antimicrobial Start 21-Day Rule:**
 - Only report another IV antimicrobial start for the same patient if there have been ≥ 21 -Days since their last IV antimicrobial dose
 - The rule still applies even if antimicrobial drugs are different
- **Pus, Redness, or Swelling at Vascular Access Site 21-Day Rule:**
 - Only report another episode of pus, redness, or swelling for the same patient if there have been ≥ 21 -Days since their last onset date of these symptoms
- **21-day rule only applies to multiple events of the same type**

21-Day Rule Applies to the Last Reported Event

- If fewer than 21 Days have passed since the last reported event of the same type, the subsequent event of the same type is NOT considered a new dialysis event and it is not reported.

Sun	Mon	Tue	Wed	Thu	Fri	Sat
Reported Positive Blood Culture	1	2	3	4	5	6
7	8	9	Positive Blood Culture 10	11	12	13
14	15	16	17	18	19	20
21	Positive Blood Culture 22	Report new positive blood cultures that occur after day 21 since the last <i>reported</i> positive blood culture.				26
					27	

Applying the 21-Day Rule to each event type (after a previous report of the same type)

Event Type	Count 21-Days...	
Positive Blood Culture	From the last PBC (specimen collection date) to the next PBC (even if microorganisms differ) <ul style="list-style-type: none">Has it been 21 or more days since the specimen collection date of the last reported PBC?	→
IV Antimicrobial Start	From the end of one IV antimicrobial course to the beginning of the next IV antimicrobial start (even if antimicrobials differ) <ul style="list-style-type: none">Has it been 21 or more days since this patient received an IV antimicrobial dose?	→
Pus, Redness, or Swelling at Vascular Access Site	From the last Pus, Redness, Swelling onset to next onset <ul style="list-style-type: none">Has it been 21 or more days since this patient's last reported onset of PRS?	→

If yes, report a new Dialysis Event.

If no, DO NOT report a new Dialysis Event.

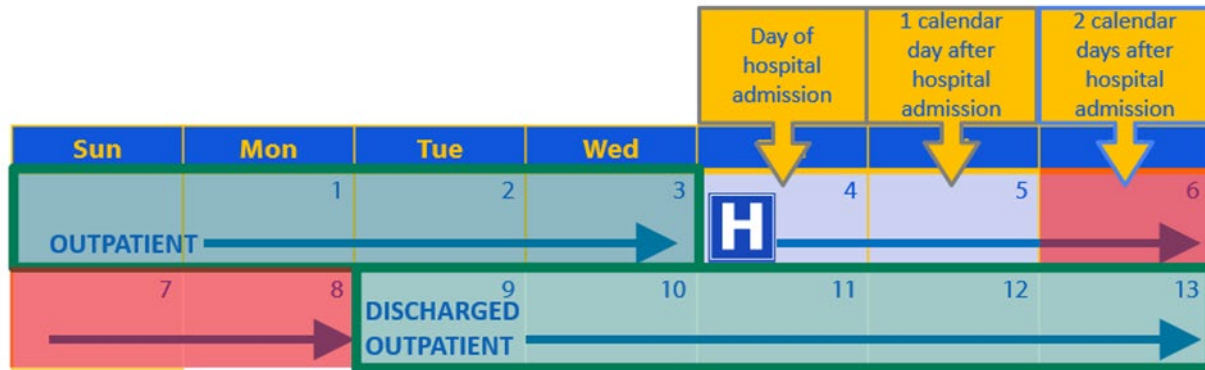

Dialysis Event Requirements – Bloodstream Infection (BSI)

Protocol: Report Numerator Data Dialysis Event Types

- Positive blood culture: Report all positive blood cultures from specimens collected as an outpatient or collected on the day of or the day following hospital admission.
 - Report regardless of whether the infection is thought to be related to hemodialysis or whether or not a true infection is suspected.

Reportable Positive Blood Cultures

- Report all positive blood cultures (PBC)
 - Collected as a hemodialysis outpatient
 - Collected within 1 calendar day after a hospital admission

- REPORT PBC if specimen was collected during this time
- Do NOT report PBC if specimen was collected during this time

Positive Blood Cultures: Requesting Information from Hospitals

- **Report all positive blood cultures (PBC)**
 - Collected as an outpatient, including Emergency Department
 - Collected on the day of, or the day after, hospital admission
- **Requires follow-up on every hemodialysis outpatient's hospitalization**
 - Implement a standardized process to request data
 - Consider requesting access to the hospital's electronic medical record
- **Hospital's medical records department unresponsive?**
 - Involve your ESRD Network
 - Develop a relationship with the hospital's infection preventionist
 - They are familiar with NHSN, although their reporting requirements differ

Positive Blood Cultures: Indicate the Suspected Source

- **“Vascular access”** if there is objective evidence of vascular access infection and it is thought to be the source
- **“A source other than the vascular access”** if another source is thought to be the source and either:
 - Culture from that site has the same organism as the blood
 - Clinical evidence of infection at the site, but site is not cultured
- **“Contamination”** if organism is thought by the physician, infection preventionist, or nurse manager to be a contaminant
- **“Uncertain”** only if there is insufficient evidence to decide among the 3 previous categories

Dialysis Event Requirements – IV Antimicrobial Start

Protocol: Report Numerator Data Dialysis Event Types

- **IV antimicrobial start: Report all starts of intravenous antibiotics or antifungals administered in the outpatient setting.**
 - A “start” is defined as a single outpatient dose or first outpatient dose of a course.
 - Report regardless of the reason for administration or duration of treatment.

IV Antimicrobial Starts can include continuations of Inpatient Treatments

- Report outpatient starts that are continuations of inpatient treatment

Sun	Mon	Tue	Wed	Thu	Fri	Sat
	INPATIENT IV Antimicrobial Start	Continuing Inpatient Course	Continuing Inpatient Course	DISCHARGED Continuing Course	Outpatient IV Anti-microbial Start	

Although IV antimicrobial treatment was started in the hospital, report the *OUTPATIENT* IV antimicrobial start that is a continuation of the inpatient treatment

**Dialysis Event Requirements – Pus,
Redness, or Increased Swelling (PRS)**

Protocol: Report Numerator Data Dialysis Event Types

– Pus, Redness, or Increased Swelling (PRS)

- **Pus, redness, or increased swelling at the vascular access site: Report each new outpatient episode where the patient has pus, greater than expected redness, and/or greater than expected swelling at any vascular access site, regardless of whether the patient receives treatment for infection.**
- **Always report pus.**
- **Report redness or swelling if greater than expected and suspicious for infection.**

Numerator (Event) Data Summary

- **Report a dialysis event for any of the three event types:**
 - IV antimicrobial start
 - Positive blood culture
 - Pus, redness or increased swelling at the vascular access site
- **Apply the 21-day rule across calendar months**
 - For a given patient, 21 or more days must pass between two dialysis events of the same type for the second occurrence to be reported as a separate (new) dialysis event
 - Rule is applied differently depending on the dialysis event type
 - Refer to the Dialysis Event Protocol if you are unsure how to report a particular event
- **Account for each event type each month:**
 - If no events occurred, confirm for that event type on that month's denominator form

**For any questions, contact the NHSN ServiceNow portal or the
NHSN helpdesk at NHSN@cdc.gov**
