

FOUNDATIONS

Building the Safest Dental Visit

Do you work in the **dental field**?
Are you interested in **infection
prevention and control**?

FREE web-based training available anytime, anywhere!

CS328628-A

Foundations: Building the Safest Dental Visit is a free resource designed to help increase adherence to established infection prevention and control guidelines among dental healthcare personnel. Learners who complete the training are eligible for 3 continuing education credits, provided by the Organization for Safety, Asepsis, and Prevention (OSAP).

Learn about:

1. The **foundations of infection prevention and control**, including existing guidelines, recommendations, and resources.
2. How to **protect patients and yourself** through proper hand hygiene, respiratory hygiene and cough etiquette, personal protective equipment, and safe injection practices.
3. Processes for **sterilization and disinfection** in the dental setting.

Find more information through **CDC TRAIN** at cdc.train.org and enter course ID: 1092544 in the search box, or visit **CDC's Infection Prevention and Control in Dental Settings** website at www.cdc.gov/oralhealth/infectioncontrol/foundations-building-the-safest-dental-visit.html.
